Digital Gauges and Interfaces for Data Collection and Analysis

like.no.other™

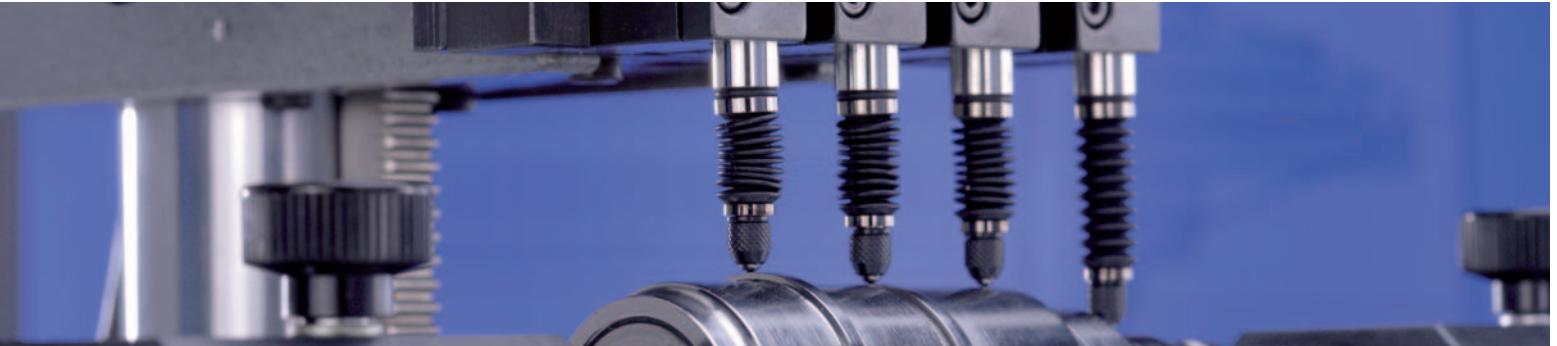

Digital Gauges and Interfaces for data collection within multiple measuring fixtures

The development of production measurement technology is being led by the increasing transition to more flexible production. This fact, as well as shorter cycle times and increased quality demands, necessitates more efficient measuring systems.

In the past random inspection at manual measuring stations was sufficient. Today, in contrast to that, inline measuring systems with automatic data collection and data processing are required in order to realize 100 % quality control.

Within multiple measuring fixtures digital gauges are increasingly used as they have essential advantages over inductive gauges. The incremental Sony gauges with their high accuracy over the whole measuring stroke provide the possibility to measure several different parts in one production line without losing time for back fitting or calibration. This leads to increased throughput of parts and significant cost-savings.

Highest resolution and accuracy

Sony digital gauges provide high accuracy measurement over the whole measuring stroke. Due to the magnetic measuring principle they are insensitive to oil, water and dust. These properties combined with the robust and compact design ensures the Sony gauges are ideal for use in flexible multi measuring fixtures in production applications.

Product overview

DK Series (p. 4-7)

- Max. resolution 0.1 µm
- Measuring length 12 mm / 2 mm
- Display LT30 Series

DG Series (p. 8-11)

- Max. resolution 0.5 µm
- Measuring length 10 / 25 / 50 / 100 mm
- Display LT20 Series

DT Series (p. 12-17)

- Max. resolution 1 µm
- Measuring length 12 / 32 mm
- Display LT10/11 Series

MG Series (p. 18-19)

- Multi channel interface for connecting digital gauges of the DK / DG / DT Series

Information on additional measuring systems and accessories are available in our General Catalogue.

Integration of digital gauges to IPC/SPC

DK / DG / DT Series

Direct connection via TTL-line driver RS422 to IPC / SPC

1-2 channel evaluation via multi-function display LT Series

- GO / NO GO output
- measuring of Max / MIN / P-P value

NPN open collector,
RS232C / BCD

- GO / NO GO Output
- measuring of Max / MIN / P-P value

IPC / SPC

SONY

SONY

Multi channel interface MG series
for connecting 64 gauges maximum

DK Series 0.1 µm

The DK Series is suitable for multi-gauge applications due to its slim 8mm diameter body.

- Measuring principle: magnetic incremental
- Measuring range: 12 mm / 2 mm
- Maximum resolution: 0,1 µm
- Accuracy: ±0,5 µm / ±0,8 µm
- Maximum response speed: 42 m/min (0,1 µm)
- Reference point
- Protective design grade: IP66
- Spindle action by vacuum or pneumatic push

| Output | A/B/Z Quadrature (Line Driver EIA-422 or equivalent) | |
| Measuring range | 2 mm/12 mm | |
| Minimum resolution | 0.1 µm | 0.5 µm |
| Minimum phase difference (*1) | | 100 ns |
| Accuracy (at 20 °C) | ±0.5 µm | ±0.8 µm |
| Measuring Force | Measuring range: 2 mm Downward: 0.45±0.25N Lateral: 0.40±0.25N Upward: 0.35±0.25N | Measuring range: 12 mm Downward: 0.6±0.3N Lateral: 0.5±0.3N Upward: 0.4±0.3N |
| Reference point | | 1 (1 mm from spindle start) |
| Maximum response speed | 42 m/min | 100 m/min |
| Feeler | carbide ball Ø 3 (Mounting screw: M 2.5 x 0.45) | steel ball Ø 3 (Mounting screw: M 2.5 x 0.45) |
| Spindle action by air | | Vacuum retraction (type LR) Pneumatic push (type VR) |
| Vibration resistance | | 100 m/s² (10~2000 Hz) |
| Shock resistance | | 1000 m/s² (11 ms) |
| Protective design grade | | IP66 (not including Interpolation box and connector) |
| Operating temperature | | 0 °C to +50 °C (Interpolation box 0 °C to +40 °C) |
| Storage temperature | | -20 °C to +60 °C |
| Power supply voltage | | +5 VDC ±5 % (*2) |
| Power consumption | | 1.8 W |
| Mass (*3) | | Approx. 20 g (measuring range: 2 mm), Approx. 30 g (measuring range: 12 mm) |
| Length of output cable | | 12 m max. (Cable length to subsequent electronics) |

*1: Contact us for models with a larger phase difference

*2: The power supply should be between +5 V and +5.25 V with cable fully extended

*3: Cable and Interpolation box are not included

LT30

Display for DK Series digital gauges

Multifunction display of compact design for connection of one or two DK gauges. The LT30 display is suitable for applications within production lines for automatic measuring and sorting of parts.

- Compact design: DIN standard size 72 mm x 72 mm
- Resolution: 0.1 / 0.5 / 1 / 5 / 10 µm
- Comparator: GO / NO GO evaluation
- Measuring of max / min / p-p value
- ADD / SUB function (2-axis model only)
- Reference point detection
- Interface RS232C or BCD available

Separate accessories
(Connectable to LT30-1GC / 2GC)

- RS232C cable
 - DZ252: D-sub 9-pin
 - DZ253A: D-sub 25-pin

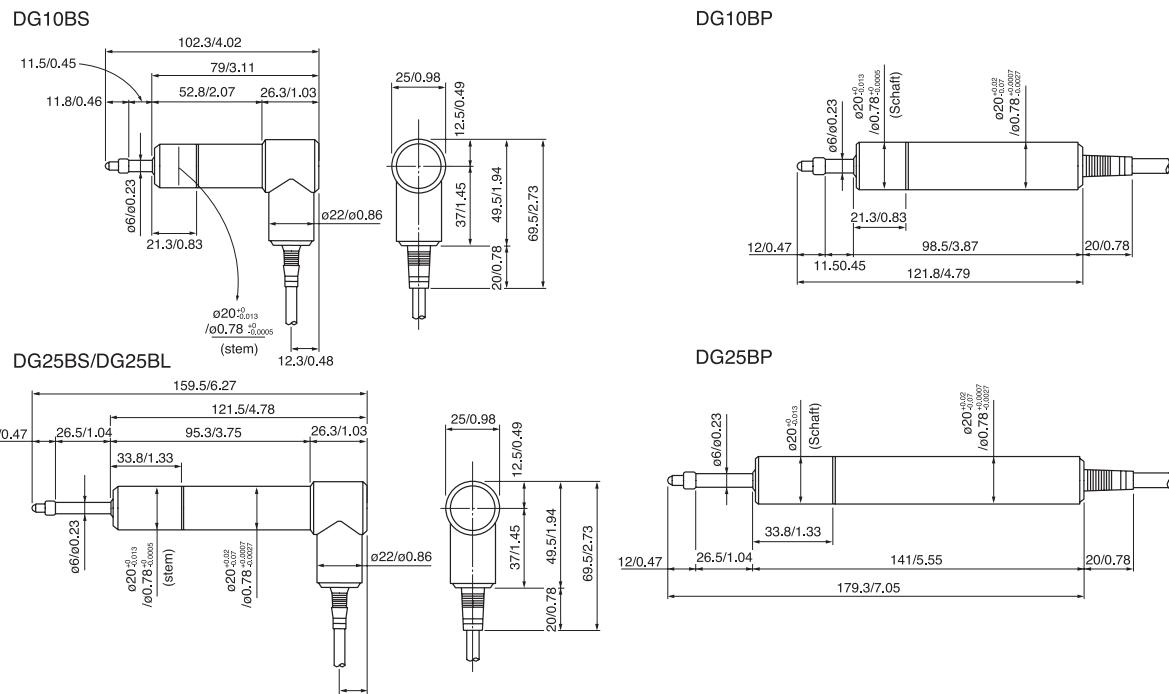

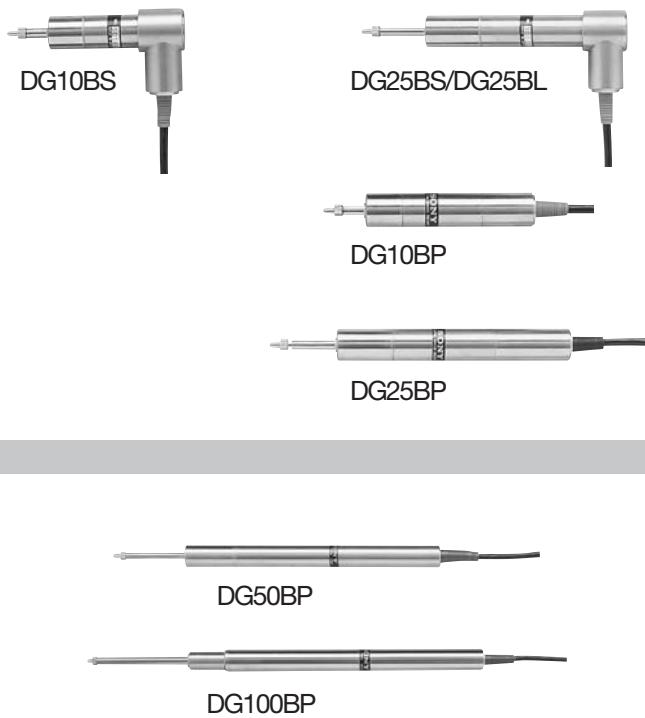

| Model | LT30-1G | LT30-1GB | LT30-1GC | LT30-2G | LT30-2GB | LT30-2GC |
|----------------------------------|---|---------------------------------|---|---------------|---------------------------------|---|
| Display | 6-digit backlit LCD display, mode indication | | | | | |
| I/O | Measuring unit inputs | 1 CH | | | 2 CH | |

DG Series 0.5 µm

Sony DG gauges are characterized by their robust design, long measuring stroke to a maximum of 100 mm and high accuracy over the whole measuring range. The DG series is suitable for applications within production lines and machine installations.

- Measuring principle: Magnetic principle
- Measuring range: 10 / 25 / 50 / 100 mm
- Max. resolution: 0.5 µm
- Accuracy: $\pm 1 \mu\text{m}$ / $\pm 2 \mu\text{m}$
- Max. response speed: 60 m/min
- Spindle can be retracted with an air pressure device
- Air lifter: DZ174 for DG 10 / 25 / 50 available

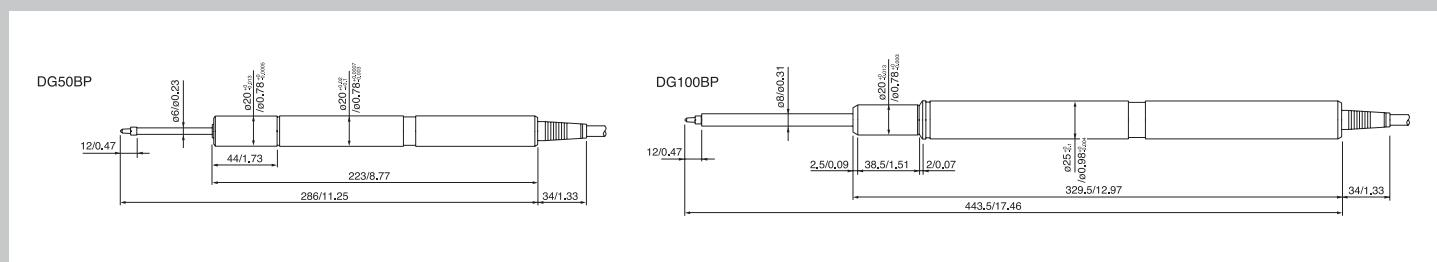

| Model | DG10BP/ BPM/BPE | DG10BS/ BSM/BSE | DG25BP/ BPM/BPE | DG25BS/ BSM/BSE | DG50BP/ BPM/BPE | DG100BP/ BPM/BPE | | | | | | | | |

*1: Use the MT10 detector (option) for connection to the DT12N/P gauge.

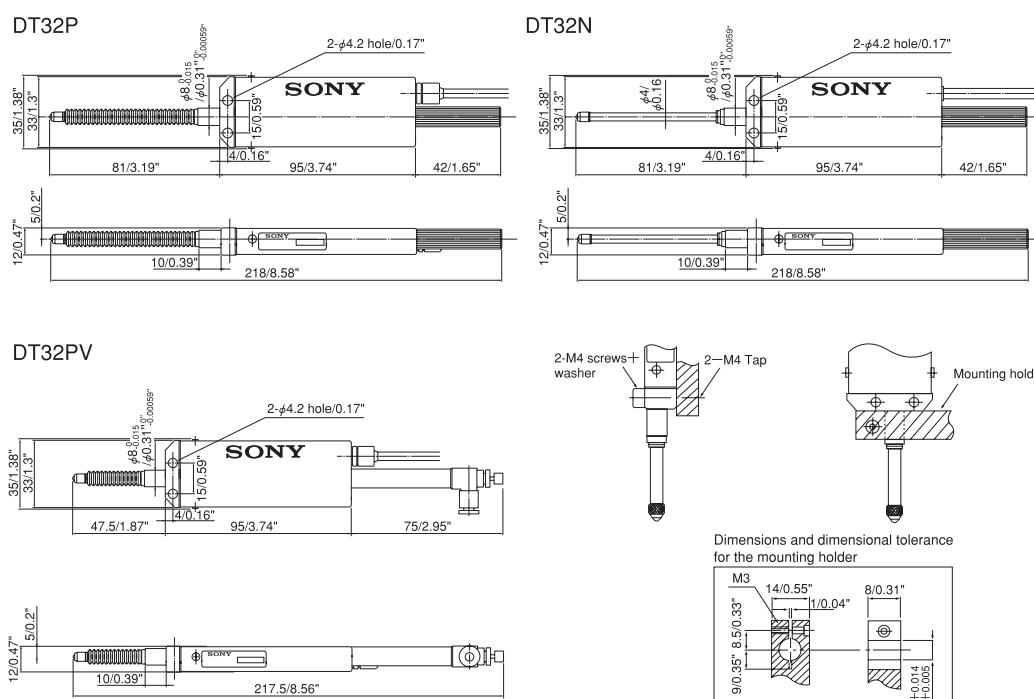

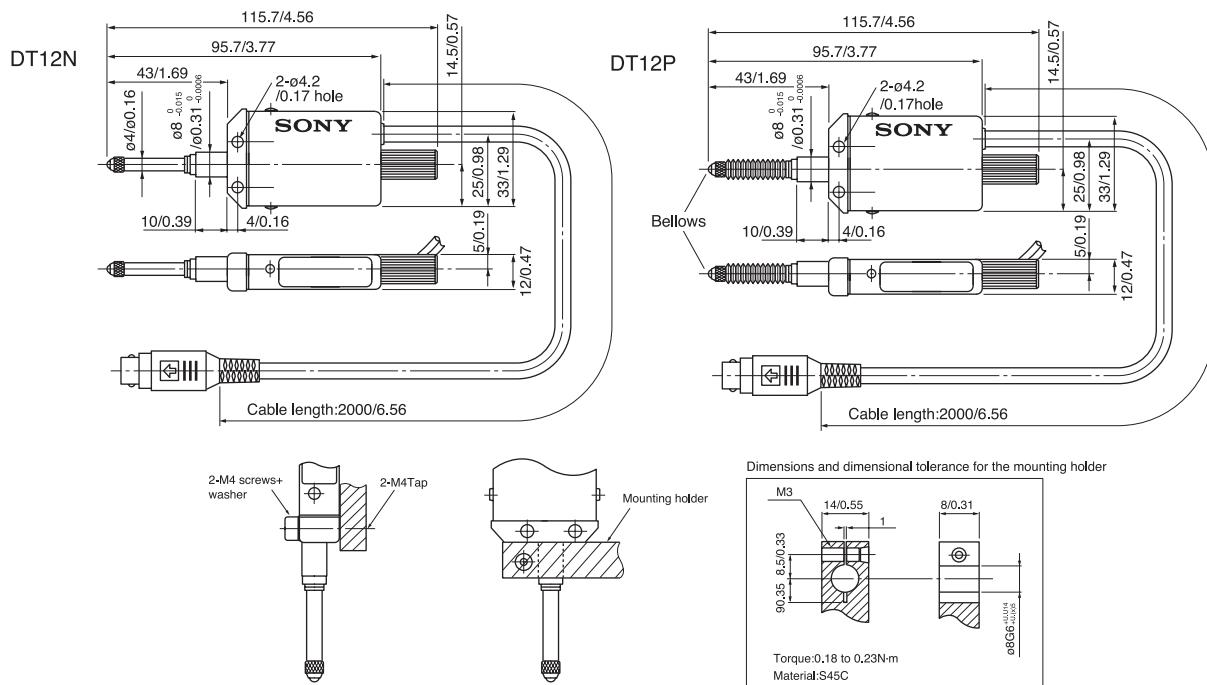

DT Series 1 µm / 5 µm

- Magnetic principle
- Excellent resistance to workshop conditions
- Resistant to oil, water and dust
- Compact design
- Accuracy: $\pm 3 \mu\text{m}$ / $\pm 5 \mu\text{m}$
- Resolution: 1 µm / 5 µm
- Measuring range: 12 mm / 32 mm
- Air lifter:
 - DT12/512: Air lifter DZ176 separately available
 - DT32: Available with integrated air lifter (DT32NV/PV)
- Main application: Measuring of parts and automatic sorting in production and assembly lines
- Optional: cable adapter MT11 for DT12/32 for connection to SPC/IPC via TTL-line-driver (RS422)

MT11

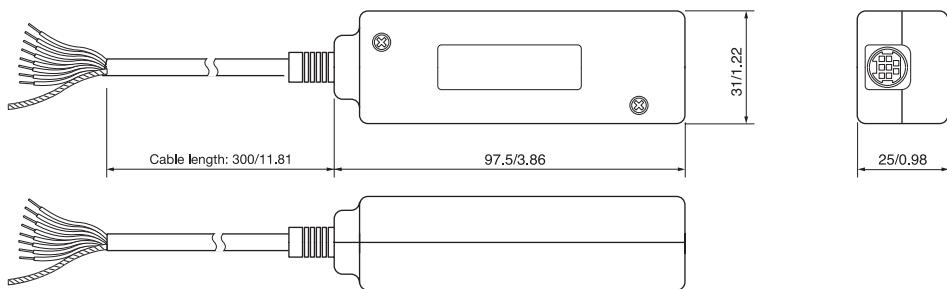

Cable detector for DT12/32

- Cable detector for Sony-gauge DT12/32 for output of TTL (RS422) output signal
- Gauges DT12/32 can be connected directly to IPC or SPC
- Resolution: 5 µm

| Model | MT11 |
|----------------------------|--|
| Compatibility | DT12N/ P DT32N/NV/P/PV |
| Resolution | 5 µm |
| Max. response speed | 60 m/min |
| Max. response acceleration | 2400 m/s ² |
| Output signal | A/B quadrature output by line driver (RS422) |
| Power supply | 5 VDC ±4 % |
| Power consumption | 1 W |
| Operating temperature | 0 °C to +50 °C |
| Storage temperature | -10 °C to +60 °C |
| Connection | open-end cable |

MT11

LT10/11 Display for DT gauges

Multifunction display of compact design for connection of one or two DT gauges. The LT10 display is suitable for applications within production lines for automatic measuring and sorting of parts.

■ Compact design: DIN standard size 72 mm x 72 mm

■ Compatibility:

- LT10 can be connected to gauge DT12/32

- LT11 can be connected to gauge DT512

■ Selectable resolution:

- LT10: 5 / 10 µm

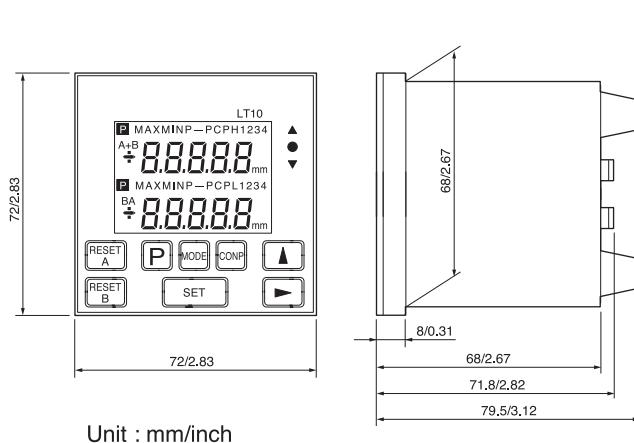

- LT11: 1 / 5 / 10 µm

■ Comparator: GO / NO GO evaluation

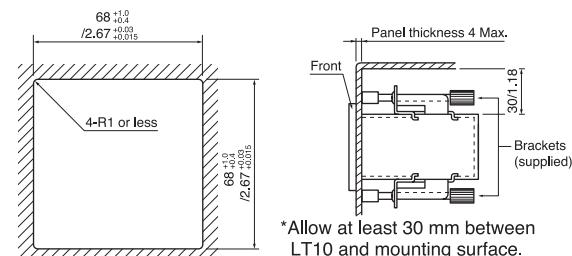

■ Measuring of max / min / p-p value

■ ADD / SUB function (2-axis model only)

■ Interface RS232C or BCD available

MG Series Multi channel interface

Multi channel interface for connecting up to 64 gauges

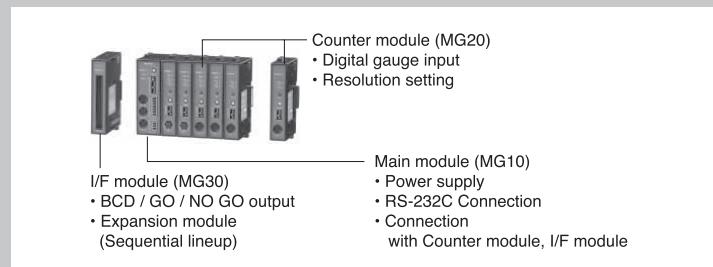

- Output via RS232C or BCD
- Mounts to a standard DIN rail (35 mm)
- Measuring of max / min / p-p value
- Comparator: GO / NO GO evaluation
- Reference point detection
- Resolution: 0.1 / 0.5 / 1 / 5 / 10 μm
- Compatible to all Sony gauges
- Applications: Detection and forwarding of measuring data to superior IPC or SPC

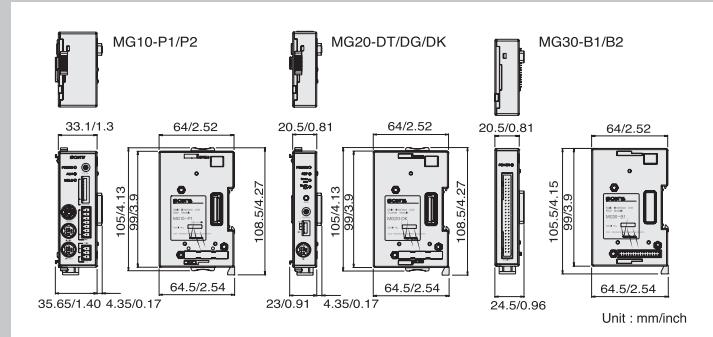

System structure

"MG" Multi Interface unit

Dimensions

| Model | | MG10-P1 | MG10-P2 |
|---------------------|---------------------------------|--|--------------------|
| Power source | Supply voltage | DC12–24 V (11–26.4 V); Allowable power start up time: 100ms or less | |
| | Power consumption | 2.0 W + total power consumption for connected modules (*1) | |
| | Inrush current (10 ms) | 10 A or less (when maximum number of modules are connected) | |
| | Power supply protection | Fuse (5 A fuse is built in) | |
| Communication | Communication I/F | RS232C (EIA232C or equivalent) | |
| | Baud rate setting | 2400 / 9600 / 19200 / 38400 bps (set with DIP switch) | |
| | Data length | 7 / 8 bit (set with DIP switch) | |
| | Stop bit | 1 / 2 bit (set with DIP switch) | |
| | Parity | none/OCD/EVEN (set with DIP switch) | |
| | Delimiter | CR/CR+LF (set with DIP switch) | |
| Linkage function | Maximum number of linkages | 16 (total of counter modules: 64) | |
| | Maximum length of linking cable | 10 m | |
| I/O | Input format | source input (+COM) | sink input (-COM) |
| | | Photo coupler insulation, external power: DC5–24 V | |
| | Output format | sink type (-COM) | source type (+COM) |
| | | Photo coupler insulation, external power: DC5–24 V | |
| Connectable modules | Input signal | reset, pause, start, latching, and data out trigger to whole channels | |
| | Output signal | integrated alarm | |
| Connectable modules | Counter modules | MG20-DK, MG20-DG and MG20DT (available for mixed use, up to 16 modules) (*1) | |
| | Interface modules | MG30-B1, MG30-B2 | |

*1: Total power of modules connected to MG10 should not be over 54 W (12 VDC Input) or 108 W (24 VDC Input)

| Model | | MG20-DK | MG20-DG | MG20-DT |
|----------------------|-----------------------------------|--|--|--------------------------------|
| Power consumption | | 1 W + power consumption for connected gauge | 1.4 W (connected to DG-B) 0.5 W (connected to DL-B) | 0.8 W |
| Measuring unit input | Corresponding gauge | DK series (A/B quadrature input) | DG**B series DL**B / DL**BR series | DT series |
| | Allowable resolution setting (*2) | 10 / 5 / 1 / 0.5 / 0.1 µm | 10 / 5 / 0.5 µm | 5 µm (DT12 / 32), 1 µm (DT512) |
| | Maximum response speed | Subject to the specification of the connected gauge | | 1 m/s |
| | Reference point (*3) | REF-LED (reference point loaded) shows on the display after the reference point is detected. Set "0" or preset value on the counter when the reference point is detected | | – |
| Others | Alarm | S-ALM LED activates by excess speed/acceleration of measuring unit. C-ALM LED activates by excess speed of the internal circuit of counter. | | |
| | | Alarm display is cancelled by reset command from MG10 or with the reset button of main unit. | | |

*2: Set the resolution value of the connected gauge

*3: MG20-DG: work only connect to DL**BR series

| Model | | MG30-B1 | MG30-B2 |
|-------------------|-----------------------|---|--------------------|
| Power consumption | | 1 W | |
| I/O | Input format | source input (+COM) | sink input (-COM) |
| | | Photo coupler insulation, external power: DC5–24 V | |
| | Output format | sink type (-COM) | source type (+COM) |
| | | Photo coupler insulation, external power: DC5–24 V | |
| Output setting | Input signal | DRQ / channel address / measuring mode shifting / comparator shifting / reset / start posing / reference point loaded | |
| | Output signal | BCD data (6 digits) / READY / code / GO/NO GO output / alarm / reference point loaded | |
| All models | Operating temperature | 0 °C to +50 °C (No condensation) | |
| | Storage temperature | −10 °C to +60 °C (20 to 90 % RH) | |
